

Job Title: DotNet Developer

Employment Type: Full-time

Work Type: On-site

Job Level: Entry-Level

Openings: 2

Interview Date: 5th November 2024 (Online Interview)

Experience Required: 0 to 1 year

Industry: MNC

Who is this for?

We are seeking a talented **DotNet Developer** to join our team and contribute to the development of high-performance applications. You will be responsible for the full lifecycle of application development, from design and coding to debugging, error logging, and testing. The ideal candidate will have hands-on experience with **ASP.NET** technologies and a strong understanding of modern development practices, including security, scalability, and performance optimization.

Key Responsibilities:

- Implement all aspects of application design, including high-performance coding, security protocols, caching mechanisms, encryption, and state management.
- Conduct code reviews and ensure coding best practices are followed.
- Collaborate with the team to debug, log errors, and test applications.
- Manage the development environment configuration to streamline development processes.
- Ensure applications are scalable and optimized for performance.

Skills & Experience:

- Proficiency in **ASP.NET** and **ASP.NET Core** frameworks.
- Experience with front-end development using **Angular**.
- Strong knowledge of **C#** and **C** programming languages.
- Ability to work on security, encryption, and performance enhancements in applications.
- Experience in application testing, debugging, and code reviews.

Benefits:

- Work in a top-tier **MNC** environment with cutting-edge technologies.
- Opportunities for professional growth and development.
- Competitive salary package.

Join us to develop robust applications and expand your expertise in DotNet technologies!
