

# Job Title: Java Developer

**Employment Type:** Full-time

**Work Type:** Hybrid

**Job Level:** Mid-Senior Level

**Openings:** 10

**Interview Date:** 28th October 2024 (Online Interview)

**Experience Required:** 0 to 1 year

**Industry:** Start-up

## Who is this for?

We are looking for a highly motivated **Java Developer** to join our start-up and contribute to building scalable and secure web applications. You will design and develop applications using **Java Spring Boot**, ensure adherence to technical design and architecture standards, and provide leadership to the project team. This role is ideal for someone who is eager to work in a fast-paced start-up environment and wants to expand their experience with cutting-edge technologies.

## Key Responsibilities:

- Design and develop highly scalable, secure, and efficient web applications using **Java Spring Boot**.
- Create and maintain technical design and architecture documentation for projects.
- Collaborate with the project team to provide technical expertise and leadership.
- Build and maintain microservices architecture, ensuring modularity and scalability.
- Implement Object-Oriented Programming (OOP) principles to optimize code structure.
- Troubleshoot and resolve technical issues in a timely manner.

## Skills & Experience:

- Strong proficiency in **Core Java** and experience with **Java Spring Boot** framework.
- Understanding of **Microservices architecture** and its implementation.
- Hands-on experience in **Object-Oriented Programming (OOP)**.
- Ability to work collaboratively in a hybrid environment.
- Excellent problem-solving skills and the ability to lead technical discussions.

If you're looking for an exciting opportunity to grow your Java expertise and lead technical projects in a vibrant start-up setting, we'd love to hear from you!
